

PLACEMENT TESTING

For students who do not possess the results of an academic English Language proficiency test, we have our own internal placement testing.

This consists of two parts:

1. Online placement test
2. Virtual meeting

PART 1: OPT

- Upon paying the registration fee students will receive instructions for the Oxford Online Placement Test.
- The instructions include a username and password to access the test.
- This is an 80-minutes test that has two parts. The first component focus on English Usage (reading, vocabulary and grammar), while the second component focuses on Listening.
- Students should take as much time as you need **without** going over the limit.

PART 2: INTERVIEW

- Once the results of the OPT are received, students will be sent a booking link by email.
- Students will book a time using the link provided and choosing “placement test interview.”
- The available slots are presented in the student’s local time and will be a virtual meeting via Teams.
- The test will consist of a speaking assessment and a writing task to be completed during the meeting.
- Students must have their **camera on** during the interview and have **a paper and pen** for the writing task.
